

## Travel Vaccinations

Following a decision made by the Department of Health & Social Care and NHS Resolution, practice staff will no longer be insured to administer private travel vaccinations. Due to this, Highbridge Medical Centre will cease providing private travel vaccinations from 1 August 2019.

We apologise for any inconvenience that this may cause.

Patients are still able to receive Tetanus, Hepatitis A and Typhoid Boosters at the practice for free as these vaccinations are provided by the NHS for Public Health Services.

All other travel health advice and vaccinations must be sought from private travel clinics.

The following is a non-exhaustive list of local travel advice and vaccination providers. Please contact them directly for further information and availability.
